12   Abstract

13   One or two sentences providing a **basic introduction** to the field, comprehensible to a

14   scientist in any discipline. Two to three sentences of **more detailed background**,

15   comprehensible to scientists in related disciplines. One sentence clearly stating the **general**

16   **problem** being addressed by this particular study. One sentence summarizing the main

17   result (with the words "**here we show**" or their equivalent). Two or three sentences

18   explaining what the **main result** reveals in direct comparison to what was thought to be

19   the case previously, or how the main result adds to previous knowledge. One or two

20   sentences to put the results into a more **general context**. Two or three sentences to

21   provide a **broader perspective**, readily comprehensible to a scientist in any discipline.

Methods

We report how we determined our sample size, all data exclusions (if any), all manipulations, and all measures in the study.
Participants

Material

Procedure

Data analysis

We used R (Version 4.3.0; R Core Team, 2023) and the R-packages *dplyr* (Version 1.1.4; Wickham, François, Henry, Müller, & Vaughan, 2023), *forcats* (Version 1.0.0; Wickham, 2023a), *ggplot2* (Version 3.5.1; Wickham, 2016), *lubridate* (Version 1.9.3; Grolemund & Wickham, 2011), *papaja* (Version 0.1.3; Aust & Barth, 2024), *purrr* (Version 1.0.2; Wickham & Henry, 2023), *readr* (Version 2.1.5; Wickham, Hester, & Bryan, 2024), *stringr* (Version 1.5.1; Wickham, 2023b), *tibble* (Version 3.2.1; Müller & Wickham, 2023), *tidyr* (Version 1.3.1; Wickham, Vaughan, & Girlich, 2024), *tidyverse* (Version 2.0.0; Wickham et al., 2019) and *tinylabels* (Version 0.2.4; Barth, 2023) for all our analyses.
